**PROJECT:**

**UPGRADING OF THE OPERATING ROOM - ITALIAN HOSPITAL - KARAK  
(SUBSTITUTION OF AN OLD ANESTHESIA MACHINE)**

**Location**

Our mission is situated in this southern part of Jordan. Karak is the poorest area of Jordan 140 Km away from the capital- Amman. Jordan is surrounded by conflicts. The events in Syria, Iraq, Egypt, Lebanon, and Palestine are influencing in many ways this country. As elsewhere in the Middle East, the number of Jordan's Christians (3% of the population) has been declining due to the actual political situation.

**Our presence**

The Italian Hospital of Karak (IHK) is the only Christian presence in the medical and social field in the whole south of Jordan; this is given us courage and determination to stay and to continue to be a small light, in this part of the world.

In the last six years we have been facing the emergency of Syrians Refugees who have fled across borders. Quite a good number of people have found a shelter in the villages and cities around the country reaching the Province of Karak.

**This event has been affecting even IHK.**

The IHK has opened its doors and welcomes Refugees who needed medical attention. Last year the IHK treated more than 2300 Syrian refugees.

**Obviously all these situations have put a serious stress on our finances.**

If we want to continue our presence we have to keep up to the standard required by the Government and by the Ministry of Health and this requires a continuous upgrading of the equipment.

The IHK is a non-profit institution. It is operating in this contest since 1935. The management entrusted to the Comboni Missionary Sisters since the beginning shows its sustainability covering the daily running expenses but it cannot face extraordinary expenses.

**That is why when we have to replace equipment or to plan an upgrading we are obliged to rely on donors.**

One urgent problem that we are facing is the condition of the ANESTHESIA MACHINE of the major general surgery room which is not functioning properly especially the mechanical ventilation part.

***We need urgently to substitute this equipment because:***

- PATIENTS ARE IN DANGER: it is an hazard for the patients and the hospital itself
- It does not answer the safety regulation and standard of the Ministry of Health
- Consequently the work in the hospital may face problems and discontinuity

The machine has been bought more than 20 years ago. We substitute already many parts but now there is no place for repair.

From January to October 2017, we had 1451 general operations and 767 obstetric and gynaecological procedures (normal deliveries, caesarean section, gynaecological surgeries).

**We received on 8/11/2017 an offer from IRADA COMPANY (see attachment)  
BUDGET REQUIRED**

➤ Product chosen: OM 3.55 - MORPHEUS M ANESHESIA WORKSTATION	
For adult - children and new born	
Isoflurane vaporizer	
Supporting arm for patient circuit	JD. 26.060
Bank charges	JD. 140
Delivery costs (transportation by airfreight)	JD. 1.600
	-----
	JD. 27.800
(Changing rate 8/11/2017 : 1 EU = 0.822 JD	<b><u>EU 33.820</u></b>

Dr. Eric Bastian Cornel KCHS came recently to visit us and we had the opportunity to share our situation. He advised us to present this project to you.

We shall be very grateful for whatever you will be able to do regarding this urgent need.

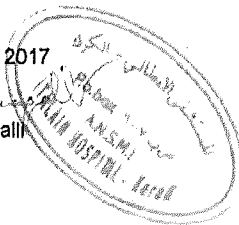

We feel that the IHK has still an important mission of dialogue between cultures and religions which is urgently needed especially in this time considering the events of the troubled conflict history of Middle East. But alone we cannot survive.

We know that you might have many requests that are waiting for answers.  
We thank you in advance for everything will be in your possibility to do.

With deep gratitude we assure you of our prayers,

Karak, 8<sup>th</sup> November 2017
