

Provide support to Local and Church Institutions

Organization Name:	Emmaus Qubeibeh Nursing Program	Project. No:	
Proposal Subject:	Installation of Dinamap patient monitor at the basic nursing lab		J2630
Organization Profile:	No. of beneficiaries 135 students	Total Request	€7,400.00

The Salvatorian Sisters, already operating a home for the elderly in Emmaus Qubeibeh, signed an agreement with Bethlehem University to open the Qubeibeh Nursing Program (QNP) for the benefit of young men and women from Ramallah and the villages northwest of Jerusalem. The program was inaugurated in 2007, focusing on developing the health service sector within the local community by educating qualified nurses. Starting with 20 students in 2007, the QNP today has a student body of 135 male and female students who aspire to acquire their bachelor's degree in nursing.

Project Description

The Salvatorian Sisters QNP facilities are equipped with machines and systems used to educate nursing students in preparation for practical training at local hospitals. In the beginning of the current year, a 'Simulation Lab' was installed at the QNP and is considered the highest standard of training in nursing education. Simulation Lab training is intended to prepare students for real-life situations and scenarios where students are observed and evaluated according to medical procedures and protocol. To help improve the program, the QNP requires three pieces of equipment that the students will be using daily in their training. The equipment is used to measure and record vital signs of patients such as the heart rates, blood pressure, body temperature and oxygen levels. The current piece of equipment that the students use is no longer used in hospitals and is considered outdated. The QNP requests a donation to the total of €7,400 to provide a new "Dinamap" patient monitor, a dropper machine and electro cardiograph (ECG) for its nurse training program.

Budget Details

Purchase & install one Dinamap Patient Monitor at the Nursing Lab	€2,200.00
Dropper machine	€3,200.00
Electro cardiograph (ECG)	€2,000.00
	€0.00
	€0.00
	€0.00
